

7TH INTERNATIONAL CONFERENCE ON ADDITIVE TECHNOLOGIES

Maribor, Slovenia, 10. - 11. October 2018

1ST ANNOUNCEMENT AND

Call for Papers

The Rapid Prototyping and Innovative Manufacturing Network - RAPIMAN is organising the 7th International Conference on Additive Technologies that will be held between October 10th and 11th, in Maribor, Slovenia.

In the last 12 years, iCAT has gathered many scientists with many different interests and yet, a common passion for inventing, developing and enjoying the possibilities of 3D printing. Especially encouraging was the presence of medical doctors at what was first a purely engineering conference. But with the growth of cooperation between doctors and engineers proving that interdisciplinary approach leads to a better healthcare in general, iCAT has evolved into an interdisciplinary conference that dedicates half of its time to applications of Additive Manufacturing in medicine.

AUTHORS ARE KINDLY INVITED TO PREPARE PAPERS THAT COVER ONE OF THE CONFERENCE TOPICS:

- Additive Manufacturing
- Materials for Additive Technologies
- Quality Control for Additive Technologies
- CAD and Innovative Simulation Methods
- Customer Input Systems and Mass Customisation
- Case Studies and Best Practice Examples
- Education for Additive Technologies

SPECIAL TOPICS

- Medical Applications of Additive Manufacturing
- Rapid Technologies and Design in Educational Processes
- Business Models and Additive Manufacturing
- Intellectual Property Rights and Additive Manufacturing Revolution
